

SurveySage®

SurveySage® is an advanced online survey tool capable of collecting data from tens of thousands of people around the globe. It has superior language capabilities. Out-of-the-box it supports eighteen world languages — and can be adapted for other languages. SurveySage® is a truly global application able to support complex survey projects.

With SurveySage® you control the process from end-to-end. You can quickly and easily create surveys, deploy them, and generate reports, even ad-hoc reports tailored to the specific needs of your organization. You don't have to depend on an outside vendor for off-line processing or reporting.

SurveySage's® power and administrative flexibility make it the only tool you'll need for large-scale survey projects.

SurveySage® is available as a hosted application directly to Valtera clients or through authorized distributors.

Ask for a demo to see SurveySage® in action and learn how it can reduce survey cycle time and save you money.
